About page 1, with an area marked

Corridor L1 downlights: please confirm 3000K rather than the 4000K in the schedule, to match the suites.

What this record is

This is a record of an ELECTRONIC approval. It is not a witnessed or notarised signature, and no identity document was checked. What it records is:

- the name entered, which is claimed rather than verified
- the email address given
- that the address the request was sent to was verified: a one-time code was sent to it and entered before the answer was accepted, so whoever answered could read that mailbox. This shows control of the mailbox, not who controls it
- the network address the answer came from
- the date and time the answer was recorded
- a fingerprint of the exact file that was shown, so it can be proved afterwards which version was answered
- the signature drawn
- the file itself, attached inside this PDF as **Corridor_Lighting_Layout_East_Wing.pdf**, so the fingerprint above can be checked against it

The answer was given once and cannot be changed. Anything said after it is marked as such above.

Generated 18 Oct, 2026, 11:59 BST by Portal Worx. The fingerprint above identifies the exact file that was seen; a file whose fingerprint differs is a different file.
